**Monthly Air Pollution Control Program Summary Report**

For ALL REGIONS - 10/16/2014 to 12/31/2014

---

*Number of Concerns Received RE:*

<i>Asbestos</i>	10
<i>Burning</i>	71
<i>Fugitive Dust</i>	15
<i>Odors</i>	30
<i>Particulate</i>	5
<i>Toxics</i>	2
<i>Other</i>	21

*Of the above, 30 concerns involved multiple emissions.*

*Total of Concerns Received:.* 121

*Number of Investigations of Concerns:*

<i>Received during report period.</i>	84
<i>Received prior to report period.</i>	15

*Total number of investigations completed:* 99

*Number of formal notices of violation issued:* 14

*Please note, the information provided in this report reflects all concerns received during the reporting period as well as all inspection activities that occurred during the reporting period regardless of the date in which the original concern was received.*

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### **Monthly Air Pollution Control Program Detail Report**

<i>Inspection</i>	<i>Date</i>	<i>Suspected Source</i>					<i>INSP</i>	
<i>Region</i>	<i>Date</i>	<i>Received</i>	<i>Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>Initials</i>	<i>NOV</i>
KCRO	2014-12-23	2014-08-22	Ronnie Flint	Fortescue	Holt	Open Dumps / Burning / Domestic Sewage, Other	DM	
<i>Concern No.</i>	20030	<i>Concern Info</i>	CP reports that RP has piles of junk on property including old insulation and trailer parts, tires, batteries, etc. Suspects RP of burning waste around the property as well. CP alleges that RP buys used porta-potties and dumps/washes them out on the property.					
<i>Comments</i>	Letter sent to require removal of solid waste and warn not to burn.							
KCRO	2014-10-16	2014-09-30	Liberty Carbon	Excelsior Springs	Ray	Air Odors	CO	
<i>Concern No.</i>	20300	<i>Concern Info</i>	A resident of Excelsior Springs, Missouri, has a concern regarding a plastic container manufacturing facility on Johnson Industrial Drive. Her complaint is that the smell from the facility is very strong – not only in outdoor air, but in her home. She thinks that it may be coming both from ambient air and possibly from the sewer. The name of the facility right across the street from her that she believes is the source of the odors is Rexam Home & Personal Care; based on an internet search, though, there are a couple of other facilities adjacent to this one that could be a source as well, including Ext Plastics and Excelsior Plastics Industries.					
<i>Comments</i>	No odor violations were observed.							
KCRO	2014-10-28	2014-10-06	Arnold McGuess	Odessa	Lafayette	Burning	DH	
<i>Concern No.</i>	20306	<i>Concern Info</i>	Odessa Fire & Rescue reports responding to an illegal burn consisting of construction materials. Cabinets, linoleum, and other construction materials from a job site were brought to this location and burned.					
<i>Comments</i>	Mr. McGuess said that that was his first and last time he would bring in trade waste to burn on his property. A Letter of Warning will be issued to Mr. McGuess.							
KCRO	2014-10-27	2014-10-06	Ryan Smith	Lake Lafayette	Lafayette	Burning / Scrap Tire Dump	DH	KCR2014102
<i>Concern No.</i>	20307	<i>Concern Info</i>	Odessa Fire and Rescue reports responding to an illegal fire containing 10-20 tires and other waste. Fire Department states that this is their second call to this address and they advised the resident of the burning regulations during their first call.					
<i>Comments</i>	Notice of Violation will be issued for burning regulated waste and 10 - 20 tires.							
KCRO	2014-10-16	2014-10-09	Liberty Carbon	Excelsior Springs	Clay	Air Odors	CO	
<i>Concern No.</i>	20422	<i>Concern Info</i>	Caller reports odors smelling of gas and sulfur are coming from one of the facilities near her house. It is suspected that Liberty Carbon is the main source of these odors. This has been going on for about three years and she has filed concerns with the City and the EPA with no luck. Odors are strongest during calm days during the afternoon. The gas company has been to her house to check to see if the odors are coming from the natural gas lines. The gas company confirmed that the gas lines were not leaking or causing the odors.					
<i>Comments</i>	No violations were observed during the investigation.							
KCRO	2014-10-28	2014-10-14	John Rechtermann	Richmond	Ray	Burning	CO	KCR2014103
<i>Concern No.</i>	20485	<i>Concern Info</i>	The concerned party observed John Rechtermann piling a large amount of trash on his property and later burning the material. He has a creek behind his property where he pushes the debris toward the creek. The burn pile is visible from the road. He burned a refrigerator recently. The burning takes place on the weekends but the pile is there all of the time.					
<i>Comments</i>	A Notice of Violation will be issued to Mr. Rechtermann for the burning of prohibited items.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
KCRO	2014-10-22	2014-10-20	Smithfield Farmland Corporation	Kansas City	Jackson	Air Odors / Particulate	MC	
<i>Concern No.</i>	20436	<i>Concern Info</i>	Via email:  There is something wrong here. You say you cannot do anything about it, but last evening and throughout the night, we could not open our windows because of all the smoke and smoke odor coming from the Farmland (formerly Cook's) ham factory down the street from our house on Wyandotte. If the smoke is strong enough to affect both of us, and we cannot allow the smoke to permeate the atmosphere in our house, what is this saying about your department? I've made several – no – many appeals to you. Give me a higher authority. We are entitled to breathe clean fresh air!					
<i>Comments</i>	No opacity was observed and odors were below limitations. No violations observed.							
KCRO	2014-10-22	2014-10-22	Smithfield Farmland Corporation	Kansas City	Jackson	Air Odors / Particulate	MC	
<i>Concern No.</i>	20438	<i>Concern Info</i>	Via voice mail:  It's about 8 minutes of six in the evening, and I just had to close my windows on my sun porch because the smoke is coming in. I don't care if it's smoke, I don't care if it's steam, but I don't want my house pervaded by smoke, smelly, odorous whatever it is. I'm tired of this. I've reported it many times. This is unhealthy; it's not healthy for us to live in; it's only healthy for Farmland to make a lot of money. I want you to smell this at this time. You told me to call you if I smelled it, and we've smelled it every evening except Sunday. This is enough already. Give me a number - give me the federal government's number - I will call them - I will call anybody who will listen, but I'm tired of this. We're not supposed to keep our house closed up; we're supposed to be able to open our windows and breath fresh air. I expect to hear from you as soon as possible. This is absolutely inexcusable, and I don't know how your department can excuse it at all.					
<i>Comments</i>	No opacity observed; odors below regulatory limit. No violations observed.							
KCRO	2014-12-04	2014-10-22	Blue River Wastewater Treatme	Kansas City	Jackson	Air Odors	CW	
<i>Concern No.</i>	20486	<i>Concern Info</i>	The wife said the odors were coming from the KCP&L Hawthorne Power plant. The husband said the odors were coming from the sewage treatment plant, then they put me on speaker phone and agreed it is the sewage plant. They contacted the Attorney General's Office who referred them to KCRO.  When this couple is driving on Northbound 435 at Hawthorne, the odors are observed through the car window. They go down to the casino sometimes in the evening from 5 - 9 pm and that is when the odors are observed, for the last 5 to 6 years. They stated they exit 435 on Front and drive to Chouteau and the odors are still detectable on Front Street. She stated she tried wearing a mask but it didn't help. The most recent time was October 18, 2014, at 7:30 pm. They didn't have the telephone number to tell them. On a scale of 1 to 5 the odor is a 5. They said a lot of businesses have left the area due to the smell.  The wife said it is a chemical smell but the husband said it is a rotten egg/sulfur smell.					
<i>Comments</i>	No violations of the Missouri Air Conservation Commission Regulations were observed at the time of the inspection. No further action warranted at this time.							
KCRO	2014-11-04	2014-10-22	Gower Baseball Park	Gower	Clinton	Fugitive Dust	SN	
<i>Concern No.</i>	20510	<i>Concern Info</i>	Caller reports excessive dust from the parking lot of the Gower Ball Field. Dust is the result of parents dropping off kids for bantam league football. This has been occurring on Tuesday afternoons starting around 4 p.m.					
<i>Comments</i>	No further actions needed.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2014-10-29	2014-10-24	Philip Flinn	Independence	Jackson	Burning	CW	
Concern No.	20496	Concern Info	During a compliance inspection at Pink Hill Acres Demolition Landfill on October 17, 2014, a large plume of black smoke was observed at the top of the landfill and appeared initially to be a landfill fire. Upon further investigation, Chrisi Johnson (Kansas City Regional Office Solid Waste and Hazardous Waste) and Amanda Horstmann (Air Pollution Control Program, Jefferson City) observed a fire on property owned by Philip Flinn. The fire produced copious amounts of black smoke for at least 30 minutes. Amanda Horstmann has photographs of the fire.					
Comments	Vegetative waste was burned without a permit. Since Mr. Flinn has no prior compliance issues and a permit would have been granted for the materials burned, a verbal warning was given to Mr. Flinn.							
KCRO	2014-11-10	2014-10-26	Charles Parsons	Peculiar	Cass	Burning	DH	KCRO201412
Concern No.	20511	Concern Info	Local fire department responded to a reported illegal burn. Found an active fire involving construction materials, porcelain sink or tub, drywall, concrete, metal stakes, lumber, branches and trees. Another pile was observed containing plastic, Styrofoam, and other man-made materials.					
Comments	NOV will be issued for burning of regulated waste and burning of vegetation and untreated wood without a burn permit.							
KCRO	2014-11-05	2014-10-28	Tyson Poultry - Sedalia Processi	Dresden	Pettis	Air Odors	CO	
Concern No.	20489	Concern Info	CP stated that the Tyson Plant in Sedalia has odors going toward his house again. His house is about 1.25 miles Southeast of the plant. He says it smells like chicken poop. This is not the first time that he has called to complain and they have put in controls in the past, but it seems like they might not be working right now.					
Comments	No violations were observed.							
KCRO	2014-11-12	2014-10-30	Audubon Ready Mix (dba Talon	Independence	Jackson	Fugitive Dust	SN	
Concern No.	20512	Concern Info	Martin Williams alleged that the facility in question, Lafarge, had emitted an inordinate amount of dust questioned one of the workers who stated, "I've got to get my gravel out, don't bother me." That about 5:30 to 6:00 am every morning the trucks are loading up there without any type of dust control in place.					
Comments	I contacted Steve Kidwell of Central Plains to have him address the fugitive dust issue that was noticed during the investigation. No enforcement action will be taken at this time.							
KCRO	2014-11-05	2014-11-03	Dan Danner	Oak Grove	Lafayette	Burning	SN	KCR2014112
Concern No.	20524	Concern Info	Sni-Valley Fire responded to a fire near Oak Grove on November 1, where an individual took a bobcat and pushed his house into the foundation. The individual then proceeded to burn the pile of debris. The fire department responded late to the fire and by the time they got there the fire was almost completely out. There were no pictures taken by the fire department. The fire department went to the property on November 3 and the responsible party was burying the burn pile.					
			Lafayette Sheriffs may have some photos but not sure.					
			May need to contact the Sheriff's department before making contact.					
			Report # 20140802 Sgt. Munson Badge #121					
Comments	A Notice of Violation will be issued for disposing of construction and demolition waste by open burning. I am also requesting that he declare that he buried waste on the deed.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2014-11-05	2014-11-04	Derek Rudroff	Raymore	Cass	Burning	CW	KCR2014120
Concern No.	20788	Concern Info	This concern was received by mail from the South Metropolitan Fire Protection District (SMFPD). SMFPD requested that we make contact with the source concern and issue a violation. They responded to the fire and observed copper wire, paint cans, and other miscellaneous wastes.					
Comments	Violations of the Missouri open burning requirements 10 CSR 10-6.045 were observed during the investigation. KCRO will issue Notice of Violation #KCR2014120810443864, for the observed violations.							
KCRO	2014-11-12	2014-11-06	Lloyd Clouse	Mayview	Lafayette	Burning	DH	KCR2014112
Concern No.	20604	Concern Info	Concern was referred from Gary Bertram from the EPA.					
	The concerned party spoke with Gary Bertram about an individual that demos mobile homes and residences. The individual takes the demo material to either the location of the business or burns it onsite of the demolished building.							
	Gary Bertram did not get the location of the burn sites, but did get the concerned party's telephone number.							
Comments	Notice of Violation will be issued for open burning of prohibited material.							
KCRO	2014-11-10	2014-11-10	Stephen Craig Strong	St. Joseph	Andrew	Burning / Open Dumps	CW	
Concern No.	20887	Concern Info	Caller reported Mr. Strong dumped dumpsters out and was burning at 18:43 on November 8, 2014.					
Comments	Minor violations of the open burning requirements were observed during the investigation. Mr. Strong was advised to not burn any regulated material. Mr. Strong is currently in enforcement for open burning violations.							
KCRO	2014-12-01	2014-11-11	Remington Arms	Lexington	Lafayette	Air Odors / Particulate	SN	
Concern No.	20575	Concern Info	Remington Arms was producing copious amounts of black smoke between the hours of 12:30 and 16:00, possibly longer on November 11, 2014. The smoke was visibly leaving the property and the odor from the smoke was similar to that of the "black snakes" fireworks. The wind was blowing from the west. The odor from the smoke was noticeable indoors as well as outside. See attached photos.					
Comments	No excess opacity or nuisance odors were noticed during the investigation. However, the facility needs to get the boiler running properly to eliminate the puffing and the associated odors that have been observed in the past.							
KCRO	2014-11-14	2014-11-11	Richmond South Waste Water T	Richmond	Ray	Air Odors	CO	
Concern No.	20583	Concern Info	Caller reports odors from the Richmond South Waste Treatment Plant was very strong on Monday (11/10) at 18:00. The caller lives on the property south of the plant and has never noticed the odors from the plant this strong. The odors smell like rotten eggs. It was 63 degrees with no wind on Monday. The plant built a new plant on this property starting last year. It is unknown whether the odors are coming from the new or old plant.					
	Note: observations can be made from concerned party's property.							
Comments	No odors were detected during the investigation.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
KCRO	2014-11-12	2014-11-12	Grant Wilson	Kansas City	Jackson	Burning	MC	
<i>Concern No.</i>	20573	<i>Concern Info</i>	This was referred by EPA. The email states: "This property is constantly burning materials that are releasing noxious fumes into the air (carpet, plastic, rubber) from renovations, camping, etc."					
<i>Comments</i>	Concern location is within the city limits of Kansas City, MO. Referred to local air pollution control agency.							
KCRO	2014-11-14	2014-11-13	Lathrop Feed and Grain	Pleasant Hill	Cass	Air Odors	CO	
<i>Concern No.</i>	20586	<i>Concern Info</i>	CP states that a local COOP has a grain pit with rotting grain, odor has been around since summer and is still unbearable, city will do nothing to help.					
<i>Comments</i>	Central co-op, may have new name, it's the only elevator in town.							
<i>Comments</i>	No violations observed.							
KCRO	2014-11-24	2014-11-17	Brian McGinnis	Orrick	Ray	Burning	SN	
<i>Concern No.</i>	20650	<i>Concern Info</i>	The Missouri Department of Natural Resources received a packet from the Ray County Sheriff's Department that included pictures and a report that stated several kids, ranging from 14-19, disposed of tires by open burning.					
<i>Comments</i>	A LOW will be issued to all the responsible parties for violations of the open burning regulation.							
KCRO	2014-11-24	2014-11-17	Nathaniel Fondaw	Orrick	Ray	Burning	SN	
<i>Concern No.</i>	20651	<i>Concern Info</i>	The Missouri Department of Natural Resources received a packet from the Ray County Sheriff's Department that included pictures and a report that stated several kids, ranging from 14-19, disposed of tires by open burning.					
<i>Comments</i>	A LOW will be issued to all the responsible parties for violations of the open burning regulation.

<i>Comments</i>	A LOW will be issued to all the responsible parties for violations of the open burning regulation.							
KCRO	2014-11-24	2014-11-24	Jessica Ard	Orrick	Ray	Burning	SN	
<i>Concern No.</i>	20777	<i>Concern Info</i>	The Missouri Department of Natural Resources received a packet from the Ray County Sheriff's Department that included pictures and a report that stated several kids, ranging from 14-19, disposed of tires by open burning.					
<i>Comments</i>	An LOW will be issued to all the responsible parties for violations of the open burning regulation.							
KCRO		2014-11-26	Conoco	Lee's Summit	Jackson	Haz Waste Generators		
<i>Concern No.</i>	20669	<i>Concern Info</i>	CP said she went to buy gas and the pump did not shut off, so another customer knocked on her window to tell her the gas was spilling on the ground and she had shut it off. When the CP went in to the station to tell them about the pump, they said it was a known problem. She said they did not intend on blocking off the pump. She said she probably had 3 gallons spill onto the ground at pump #9.					
<i>Comments</i>								
KCRO	2014-12-04	2014-12-02	Quality Aggregates	Kansas City	Jackson	Fugitive Dust	MC	
<i>Concern No.</i>	20671	<i>Concern Info</i>	Anonymous individual alleged that the company, "Quality Aggregates," on Highway 350 and Noland Road in Kansas City, Missouri, had trucks coming out the back entrance where trucks exit (on Jackson County property he believes) dropping a large amount of dust onto Noland Road that is causing a breathing and deposition issue on local residences. The worst time is during the afternoons he alleges. He is asking for an investigation as this is ongoing.					
<i>Comments</i>	Referred to Kansas City Health Department's Air Quality Program.							
KCRO	2014-12-30	2014-12-03	Richmond South WWTP	Richmond	Ray	Air Odors / Treatment Plant Operation	CO	
<i>Concern No.</i>	20785	<i>Concern Info</i>	Odors are coming from the Richmond South WWTP again today. Wind is coming out of the north and odors are observed south of the plant.					
			Note: Observations can be made on the CP's property. Call before entering the property because there are dogs.					
<i>Comments</i>	A slight odor could be detected off-site, but no odors were detected at 7:1 of 4:1 dilutions through the Nasal Ranger. No violations at the time of investigation.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. ### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2014-12-09	2014-12-08	Stewartsville Post Office	Stewartsville	Dekalb	Asbestos	CW	
Concern No.	20791	Concern Info	Concerned party called EPA and reported that they stopped off at the post office at 406 Main Street, Stewartsville, Missouri, on their way out of town, Saturday, December 6, 2014. They observed floor tile being removed and ground, which resulted in considerable visible dust emissions. No PPE or asbestos signage was reported observed.					
The complainant and his wife are concerned about their potential exposure from fugitive emissions and that of the working staff employees and the general public (especially parents with children and infants). He stated that he is not wanting to cause any trouble or get anyone in trouble, but he felt a hazardous situation had been created at the post office while it was open for daily business and we should be made aware.								
Comments								
KCRO	2014-12-15	2014-12-09	Dixon Builders	Sedalia	Pettis	Burning	SN	KCR2014121
Concern No.	20793	Concern Info	I received an email from Mark Stevenson of Pettis County Fire Department as follows:					
"We were sent to the scene by the Pettis County Sheriff's Department on today's date at approximately 13:30 hours. This call came into the PCSO by a female with DNR or that's what we were advised of. Subject that admitted lighting the fire is Duane Dixon and his telephone number is 660-619-0416. I have a copy of a report that I can send to you as well."								
The subject of the email said "Illegal burn at 4400 West Main Street, Sedalia, Missouri." The email also had 3 pictures attached that I put in this report. I also requested for him to email me the fire incident report.								
Comments	An NOV will be issued to Dixon Builders for disposing of construction waste by open burning. An LOW will be issued to Donnie Chaplin for allowing construction waste to be disposed of on his property.							
KCRO	2014-12-12	2014-12-11	Lloyd Clouse	Mayview	Lafayette	Burning	DH	KCRO201412
Concern No.	20794	Concern Info	There was some burning in Mayview, Missouri. The responsible party tore some houses down and are burning the shingles, wood, and other demolition waste. The burning has been occurring at multiple different locations in and around Mayview. There is some burning that is actually going on as of right now and has been happening off and on for the last couple of weeks. The concerned party believes that it is being done by the same people.					
The location of the burn is right off E Highway, which is the main road of Mayview. You should be able to see the burn piles from the road. E Highway is also known as Main Street and the burning is going on in the middle of the town.								
I contacted the Sheriffs Department after I couldn't get a hold of the local fire department. They said that there was a controlled burn going on in Mayville at 208 Broadway. I informed her that if it was a controlled burn that was burning construction and demolition waste that they would be in violation of the open burning regulation. The dispatcher told me she was going to contact the local Fire Department and relay this information.								
Comments	A Notice of Violation will be issued for burning demolition waste.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
KCRO	2014-12-12	2014-12-11	Lloyd Clouse	Mayview	Lafayette	Burning	DH	KCRO201412
<b>Concern No.</b>	20795	<b>Concern Info</b>	Received call from concerned party about another burn taking place at a residence that was investigated in November. The demolition material was from the residence that was burning. Thick smoke was inhibiting the concerned parties breathing. Address of the residence on fire is 209 Marshall in Mayville.					
<b>Comments</b>	A Notice of Violation will be issued for burning demolition waste.							
KCRO	2015-01-06	2014-12-16	Conveyance Solutions by Contin	St. Joseph	Buchanan	Fugitive Dust	SN	
<b>Concern No.</b>	20805	<b>Concern Info</b>	Concerned Party is worried about fugitive dust from a company that is located south of his property. Continental Screw Conveyor conducts sandblasting on their property and the dust leaves their property and drifts onto the CP's property.					
<b>Comments</b>	A Letter of Warning will be issued for probable violations of 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin.							
KCRO		2014-12-16	E & S Rock, LLC	Holden	Johnson	Fugitive Dust	SN	
<b>Concern No.</b>	20806	<b>Concern Info</b>	Caller reports that E & S Rock has moved in a new, larger crusher and started using it about a week ago. Caller is worried the crusher is closer to the property boundary than allowed.					
<b>Comments</b>	Caller reports he is still experiencing fugitive dust. Dust is pretty much a constant issue from early morning until late evening daily.							
KCRO	2014-12-19	2014-12-18	G R P Petroleum, Inc. (DBA Phil	Belton	Cass	Asbestos	CO	KCR2014121
<b>Concern No.</b>	20833	<b>Concern Info</b>	On the evening of December 17, 2014, I observed an apartment complex that appeared to be in the process of being demolished. I reviewed KCRO's asbestos database and did not find any notifications within Belton. I gathered additional information on the property from the Cass County Assessor's online information and the City of Belton.					
<b>Comments</b>	The address for this site is 913 North Scott. There is also a Phillips 66 gas station on this parcel. Rameshbhai "Ricky" Patel owns and operates both the gas station and the apartment.							
<b>Comments</b>	A Notice of Violation will be issued for the failure to perform an asbestos inspection and failure to notify DNR of demolition.							
KCRO		2014-12-18	KAT Excavation	Pleasant Hill	Cass	Burning	CW	
<b>Concern No.</b>	20834	<b>Concern Info</b>	Main Office: 309 North Oak Street; Bates City, Missouri 64011.					
<b>Comments</b>	Caller reports a large pile of vegetation was burning on December 17, 2014, at the lot north of the Pleasant Hill Fairgrounds. Smoke and ambers were blowing into town up to Main Street. The fire continued to burn past 17:00. The pile was created from land clearing for the Little Blue Valley Water District. KAT Excavation was conducting the burn.							
<b>Comments</b>	After contacting Pleasant Hill Fire and Rescue, Assistant Chief Nathan Carpenter told me Mr. Daniel Denny had been issued a burn permit for a separate site in Pleasant Hill. He told Mr. Denny to apply for a burn permit for the current site. Asst. Chief Carpenter told me the fire department may require KAT Excavation to operate an ACD.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2015-01-07	2014-12-26	Jeff and Sheryl Claunch	Homestead Village	Ray	Burning	SN	
Concern No.	20844	Concern Info	Homeowner burning waste straw from dog pen. This is the 4th weekend in a row that this has happened. Today he is burning in a barrel, but he normally burns in small piles on the ground. Concerned party has contacted Wood Heights Volunteer FD and is waiting on a return call.					
Comments	An LOW will be issued for violations of the open burning regulation, including burning vegetative waste without a burn permit.							
KCRO		2014-12-29	Ed Meyer	Napoleon	Lafayette	Open Dumps / Burning		
Concern No.	20855	Concern Info	Demo trash was thrown into a bank and partially burned behind the CP's house by neighbor next door. Dumping began last summer. Source of concern is not cooperating with neighbors to clean up the area when asked to do so. Creek is right below the trash/demolition pile. CP also believes that asbestos could be dumped and/or buried around the same area, but was not sure. CP would like to have the investigator visit him first so he may show the way to the area of concern.					
	Note: House number for neighbor is not displayed fully, so CP doe not have a specific address for source of concern.							
Comments								
KCRO		2014-12-30	Christopher Siela	St. Joseph	Buchanan	Burning / Open Dumps	CW	
Concern No.	20886	Concern Info	Received an incident report from South Central Buchanan Fire Department. According to report, Chris Seila was burning wood and wood shavings without a permit on December 30, 2014, at 1:46 a.m. Fire department states wood material appears to be from a tree trimming business, but Mr. Seila denies this allegation and told the fire department the material originated from his property. Fire department also noticed about 20 tires in the area, but the tires were not involved in the fire.					
Comments								
NERO	2014-10-16	2014-10-14	Curtis and Jessica West	Laredo	Grundy	Burning	DB	
Concern No.	20335	Concern Info	Caller states Curtis and Jessica West are burning materials that are causing health problems for neighbors. Within the last 30 days, a neighbor who has asthma had to be rushed to the E.R. due to smoke from the West property. Caller states the Mayor contacted the Grundy County Sheriff's Department about two months ago and they responded. But the burning continues, especially at night. Caller thinks the burning is taking place to cover something illegal.					
	Caller is calling on behalf of the Laredo City Council. Please call 660-286-2632 and speak with Ashley Boren, City Clerk, to discuss findings of the investigation.							
Comments	Violation of 10 CSR 10-6.045 Open Burning Requirements. A Letter of Warning is being issued.							
NERO	2014-10-17	2014-10-15	Murphy Brown Whitetail facility	Unionville	Putnam	Air Odors	SB	
Concern No.	20398	Concern Info	The caller reported the following odors from Murphy Brown Whitetail at their house: On October 10, 2014 - they reported strong hog odors in the area. On October 11, 2014, they reported odors were strong on and off all during the day. On October 12, 2014, they reported odors were strong on and off all day also.					
Comments	No current inspection conducted with regard to this specific concern; however, all concerns are logged and reviewed for development of an effective investigation strategy. Staff will conduct an odor investigation at a later date when weather conditions are predicted to be similar to the conditions noted by the complainant.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO	2014-10-29	2014-10-21	Robert Gilpin	Russellville	Cole	Burning	PM	07282688
Concern No.	20405	Concern Info	On October 21, 2014, received a call from Gary Bertram, U.S. EPA at 1040 hrs. He reported taking an anonymous call regarding a house that had burned and that the party is stacking up the remains of the house and burning as a means of disposal.					
Comments	Mr. Bertram reported that the caller said they tend to burn at night.							
	Violation of the Missouri Air Conservation Commission Regulation 10 CSR 10-6.045(3), Open Burning Requirements.							
	Issued a Notice of Violation on November 18, 2014.							
NERO	2014-10-28	2014-10-21	City of Columbia Sanitary Landfil	Columbia	Boone	Air Odors	CB	
Concern No.	20412	Concern Info	10/21/2014 - Email provided by Steve Boone to Pete Muzio; "...Tom Phillips (AGO attorney) mentioned that Friday evening (10/18), he smelled a sulfur odor that he thought could possibly be coming from the Columbia LF. Tom has mentioned he has a friend that owns property near the landfill and has reported to Tom that he can detect odors from the landfill on occasions. Tom mentioned he lives about 5 miles from the landfill so there could have been other sources."					
Comments	No odor violation found.							
NERO	2014-10-24	2014-10-21	River of Life Ministries in Him, In	Louisiana	Pike	Asbestos	SB	13314866
Concern No.	20413	Concern Info	Caller reports that a former store is undergoing renovations and shingles, interior items, and flooring can be viewed on the outside of the building piled up. Caller is concerned that the building has not been inspected for asbestos. Caller does not know the owners.					
Comments	Issue a Notice of Violation to River of Life Ministries for failing to inspect prior to renovation. Require an inspection of remaining materials in the building prior to further renovations. Provide results of the inspection to the Regional Office within 30 days.							
NERO	2014-10-28	2014-10-21	Colonel's Flea Market	Macon	Macon	Open Dumps	BS	
Concern No.	20414	Concern Info	Caller reports that Colonel's Flea Market routinely dumps broken furniture over the embankment north of the building. Caller reports that brush is piled over the furniture and burned. Caller reports that broken wooden furniture is currently dumped over the embankment.					
Comments	NERO will issue a LOW to Mr. Larry Brown as a result of the violations observed and information obtained during the investigation. The LOW will require remaining solid waste and ash be removed and properly disposed at a permitted facility. Additionally, the LOW will require receipts along with a signed air pollution response letter be submitted to NERO. BS							
NERO	2014-10-29	2014-10-22	Jamie & Cathrine Mundy	Thompson	Audrain	Burning	SB	
Concern No.	20423	Concern Info	The caller reports that Jamie and Cathrine Mundy are burning copper wire in their wood stove at nights and are burning copper wire and other materials on their property for salvage and disposal. They may be burning the wire for Gregory Smith, who reportedly is always getting in trouble with law enforcement for burning copper wire. The burning is taking place at noon on October 22.					
Comments	No evidence of an open burning violation found at the time of the investigation. Send informational letter to Ruth Mundy and Jamie Mundy discussing open burning restrictions prohibiting burning of copper wire and other materials. Send informational letter to Greg Smith about burning and asbestos demolition requirements (since he is a contractor).							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

NERO	2014-11-20	2014-10-24	Cesario Tinoco	Marshall	Saline	Burning	PM	
Concern No.	20440	Concern Info	Caller states man (Cesario Tinoco) is burning remodeling waste and has been for two years. Caller called fire department and sheriff department several times within last year but man does not stop burning. He may stop for a short time but starts up again. Caller is sick and tired of smelling foul odor, especially on the weekends when home. Caller states a large pile of remodeling waste is located on the property and has a feeling man will burn on Sunday afternoon. Caller states man works for a remodeling business. Caller states the man does not live at the property where he is burning. He lives in town (see address below). Caller provided address from visiting the assessor's office.					
			Caller initially requested to speak with Pete Muzio.					
Comments	No violation of 10 CSR 10-6.045, Open Burning Requirements.							
	Mr. Tinoco was briefed on the burning regulations and provided copies of the department's factsheet on Open Burning and the regulation titled Open Burning Requirements. Letter will request plastic bags be taken off leaves and placed in refuse container.							
NERO		2014-10-24	Unknown	Russellville	Cole	Burning	PM	
Concern No.	20441	Concern Info	Caller reports that a trailer collapsed recently and there are people taking it apart and piling it in sorted piles. Caller suspects that they intend to burn the waste and requests we inform them of the OB regulations.					
Comments								
NERO	2014-10-28	2014-10-27	Unknown	Jefferson City	Cole	Open Dumps	BS	
Concern No.	20443	Concern Info	Caller states that residents of Apache Manor Mobile Home Park are having their children drag residential trash down to the creek that flows into Binder Lake rather than placing it in the dumpster for proper removal. Caller states that the trailer court has regular trash service but the children are not tall enough to place it into the dumpster. Caller also states that there is a pile of scrap lumber near the creek. Caller states that the waste is coming from multiple mobile homes.					
			POC's for Apache Manor Mobile Home Park:					
			onsite mgr, lot #2 Richard Humphrey 573-645-7348					
			property mgr Justin Donald, 573-340-5810					
Comments	Violations of the MSWML and Air Conservation Commission Regulations were determined. NERO will issue a LOW to the Apache Manor Mobile Home Park as a result of the violations observed. The LOW will require remaining solid waste and ash be removed and properly disposed at a permitted facility. The LOW will require receipts along with a signed air pollution response letter be submitted to NERO. Additionally, a letter containing fact sheets on the proper disposal of waste will be sent to the residents of Lot #11. BS							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### **Monthly Air Pollution Control Program Detail Report**

<i>Inspection</i>	<i>Date</i>	<i>Suspected Source</i>						<i>INSP</i>				
<i>Region</i>	<i>Date</i>	<i>Received</i>	<i>Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>				<i>Initials</i>	<i>NOV</i>	
NERO	2014-10-29	2014-10-27	Robert Gilpin	Russellville	Cole	Burning						PM
<i>Concern No.</i>	20444	<i>Concern Info</i>	The Russellville fire chief called to pass along a report that the Gilpin family continues to burn demolition waste after being told it was not allowed under state regulations by the Russellville Fire Department. A Cole County Sheriff's deputy was also present when the initial warning was given. Burning of demolition waste was taking place in a pit partially covered with dirt on Sunday evening, 10/26 at about 7 p.m. Mr. Gilpin said the dirt was to keep down the smoke. Also, the fire chief was told that it was brush that was burning and that the Gilpins had not started the fire. However, it was obviously demolition waste burning (there was a significant amount of black smoke and boards and other materials were observed in the pit).									
<i>Comments</i>	Violation of the Missouri Air Conservation Commission Regulation 10 CSR 10-6.045(3), Open Burning Requirements. Issued a Notice of Violation on November 19, 2014.											
NERO	2014-10-28	2014-10-27	Columbia SLF	Columbia	Boone	Air Odors						CB
<i>Concern No.</i>	20447	<i>Concern Info</i>	Caller states that a couple weeks ago, while driving a on Rogers Road a 1/2 mile south of the Columbia SLF, a strong natural gas smell was detected with the windows up. Caller also stated that a friend smelled odors 5 miles east of the SLF over the past couple of weeks. Caller stated this odor was never smelled during walks in this same area approximately 10 years ago.									
<i>Comments</i>	No odor violation found.											
NERO	2014-10-31	2014-10-27	Thaddeus Beeler	Lancaster	Schuyler	Burning						DB 08042904
<i>Concern No.</i>	20468	<i>Concern Info</i>	MEERTS Incident 1410251657SMC Discovery Date: 10/25/2014 4:57:00 PM Incident Date: 10/25/2014 4:57:00 PM The caller with the Lancaster Fire Department wanted to report the illegal burn of several different types of solid waste materials. The owners name or physical address could not be recalled at the time of the call, but they had contacted the fire department earlier in the month about conducting a brush fire. Fire personnel visited the site before giving the ok. They witnessed all kinds of solid waste and building materials, including what was described as slate siding and roofing shingles among other material. Because of these materials they denied the property owners the right to burn the brush pile. At 1311 on 10/27/14, the property owners again asked to burn and again was denied. Then they were notified that they started the brush fire anyway. The fire department arrived on scene and was able to retrieve some the "slate siding," but did not make an effort to extinguish the fire. At the time of the call to the spill line the fire had mostly burned out and was just smoldering. The individuals that set the fire were the grandsons of the property owner. Mrs. Watson stated that she would get statements from her staff that witnessed the burn pile for the investigator.									
<i>Comments</i>	Violation of 10 CSR 10-6.045 Open Burning Requirements- burning or allowing the burning of demolition waste.											
NERO	2014-10-29	2014-10-29	Columbia Landfill	Columbia	Boone	Air Odors						SB
<i>Concern No.</i>	20519	<i>Concern Info</i>	The caller reported to Larry Lehman with the Solid Waste Management Program that there were strong odors believed to be coming from the Columbia SLF this morning.									
<i>Comments</i>	Issue Notice of Excess Emissions for excess emissions of odors.											

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
NERO		2014-11-04	Curtis and Jessica West	Laredo	Grundy	Air Odors	CB	
<i>Concern No.</i>	20552	<i>Concern Info</i>	Via email: I received information today from a neighbor that there was burning activity on October 30th at the West's property. I am assuming they should have received their letter by this date. Additional information via telephone: burning unknown materials occurred at about 7:30 PM on the 30th, two neighbors reported. Previous LOW ACE# 20335 mailed 10/23/14.					
<i>Comments</i>								
NERO		2014-11-05	Columbia Landfill	Columbia	Boone	Air Odors	SB	
<i>Concern No.</i>	20551	<i>Concern Info</i>	Caller reports that gas odors from Columbia Landfill have been extremely bad recently. Reports that about 3 weeks to a month ago, driving on Rogers Road near the landfill it was like driving through a pool of natural gas with odors strong enough to gag you with the windows up. More recently, last week 2-3 days before the freeze, odors were strong enough to stop her breathing for a bit and almost made her dog collapse. A couple days later, woke up to chokingly strong gas in and around her house at about 630-7 AM. Also, reports that a neighbor told her that there was a sound like an explosion from the landfill and visible fire. Gas strong enough to cause physical illness and one person has been taken to hospital because of exposure to it. Odors were detected in dip on Rogers Road 3 weeks ago (east side of landfill) and near Thompson & PP last week(residential area south/southeast of landfill). Previously contacted Ameren to report possible gas leak and was told there were no gas lines in that area. Odor smells like natural gas.  Note: recent investigation into landfill odors found odor violation.					
<i>Comments</i>								
NERO	2014-11-17	2014-11-17	Murphy Brown Whitetail	Unionville	Putnam	Air Odors	CB	
<i>Concern No.</i>	20638	<i>Concern Info</i>	On November 15, 2014, caller reported strong hog manure odor originating from Murphy Brown Whitetail on the following dates and times:  October 11, 2014 - Strong odor all day long. October 12, 2014 - Strong odor all day long. October 22, 2014 - Strong odor all day long					
<i>Comments</i>	No current inspection conducted with regard to this specific concern; however, all concerns are logged and reviewed for development of an effective investigation strategy. Staff will conduct an odor investigation at a later date when weather conditions are predicted to be similar to the conditions noted by the complainant.							
NERO	2014-11-17	2014-11-17	Murphy Brown Whitetail	Unionville	Putnam	Air Odors	CB	
<i>Concern No.</i>	20640	<i>Concern Info</i>	On November 15, 2014, caller reported strong hog manure odor originating from Murphy Brown Whitetail on the following dates and times:  November 9, 2014 - Strong odor during evening hours. November 14, 2014 - Strong odor during evening hours. November 15, 2014 - Horrible odor the entire day.					
<i>Comments</i>	No current inspection conducted with regard to this specific concern; however, all concerns are logged and reviewed for development of an effective investigation strategy. Staff will conduct an odor investigation at a later date when weather conditions are predicted to be similar to the conditions noted by the complainant.

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO		2014-12-04	Koert Minish	Holts Summit	Callaway	Burning	PM	
Concern No.	20691	Concern Info	Caller reports the Minish's are burning a board.					
Comments								
NERO		2014-12-04	Robert Manny	Thompson	Audrain	Burning	SB	
Concern No.	20692	Concern Info	Caller reports that Robert Manny is stripping out a house and burning the materials including plastic, carpet, furniture, and siding. Burning has been occasional for the last two weeks and there is a large pile now so it will probably be burned tonight. The property is owned by a married couple and the husband died recently. The wife's name is probably Annette Bagley or similar.					
Comments								
NERO		2014-12-04	Cesario Tinoco	Marshall	Saline	Burning	PM	
Concern No.	20693	Concern Info	Caller report Mr. Tinoco may be burning C and D waste at night. Last burning was December 3rd.					
Comments								
NERO	2014-12-10	2014-12-08	Daniel Nash	Fulton	Callaway	Burning / Toxics	PM	
Concern No.	20701	Concern Info	Caller states neighbor is burning illegal materials in a woodstove. Caller states the neighbor owns a duplex but he lives in the basement of the duplex. Renters live in the duplex. The door to the basement is next to an alleyway behind the duplex. Caller states odor and smoke coming from his basement and smoke stack is making her family sick. Caller states neighbor burns throughout the year, not just during cold winter months. Caller states daughter has asthma and has been in the hospital twice due to smoke caused by the neighbor. Caller states this has been going on for 3.5 years.					
Caller has called the Fulton Police Department and the Fulton Fire Department on several occasions. It might be wise to work in coordination with the police department.								
Please view Casenet.								
Please call complainant when the investigation has concluded.								
Comments								
No construction materials were observed burning.								
No violation of Missouri Open Burning Requirements, 10 CSR 10-6.045.

The fire department arrived on scene and was able to retrieve some the "slate siding," but did not make an effort to extinguish the fire. At the time of the call to the spill line the fire had mostly burned out and was just smoldering. The individuals that set the fire were the grandsons of the property owner. Mrs. Watson stated that she would get statements from her staff that witnessed the burn pile for the investigator.					
<i>Comments</i>	Violation of 10 CSR 10-6.045 Open Burning Requirements- burning or allowing the burning of demolition waste.							
NERO	2014-10-29	2014-10-29	Columbia Landfill	Columbia	Boone	Air Odors	SB	
<i>Concern No.</i>	20519	<i>Concern Info</i>	The caller reported to Larry Lehman with the Solid Waste Management Program that there were strong odors believed to be coming from the Columbia SLF this morning.					
<i>Comments</i>	Issue Notice of Excess Emissions for excess emissions of odors.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
NERO		2014-11-04	Curtis and Jessica West	Laredo	Grundy	Air Odors	CB	
<i>Concern No.</i>	20552	<i>Concern Info</i>	Via email: I received information today from a neighbor that there was burning activity on October 30th at the West's property. I am assuming they should have received their letter by this date. Additional information via telephone: burning unknown materials occurred at about 7:30 PM on the 30th, two neighbors reported. Previous LOW ACE# 20335 mailed 10/23/14.					
<i>Comments</i>								
NERO		2014-11-05	Columbia Landfill	Columbia	Boone	Air Odors	SB	
<i>Concern No.</i>	20551	<i>Concern Info</i>	Caller reports that gas odors from Columbia Landfill have been extremely bad recently. Reports that about 3 weeks to a month ago, driving on Rogers Road near the landfill it was like driving through a pool of natural gas with odors strong enough to gag you with the windows up. More recently, last week 2-3 days before the freeze, odors were strong enough to stop her breathing for a bit and almost made her dog collapse. A couple days later, woke up to chokingly strong gas in and around her house at about 630-7 AM. Also, reports that a neighbor told her that there was a sound like an explosion from the landfill and visible fire. Gas strong enough to cause physical illness and one person has been taken to hospital because of exposure to it. Odors were detected in dip on Rogers Road 3 weeks ago (east side of landfill) and near Thompson & PP last week(residential area south/southeast of landfill). Previously contacted Ameren to report possible gas leak and was told there were no gas lines in that area. Odor smells like natural gas.  Note: recent investigation into landfill odors found odor violation.

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO	2014-12-29	2014-12-15	J & P Iron and Metal	Hannibal	Ralls	Burning	CB	
Concern No.	20802	Concern Info	They are burning on a regular basis at the old J&P Iron and Metal property on Warren Barrett Drive in Hannibal. City of Hannibal and DNR staff have told those responsible that they are not allowed to burn at the property. A solid waste Letter of Warning was issued in September 2014. See ACE investigation #20068.					
Comments	A Letter of Warning will be issued to Mr. Gene Haynes for open burning of regulated solid waste and burning without a permit.							
NERO		2014-12-24	Danny Reese	Downing	Schuyler	Burning / Scrap Tire Dump	DB	
Concern No.	20847	Concern Info	Caller states man who owns tire shop burns tires every night. The man lives on a gravel road next door to the tire shop. The location is near a grocery store and bar. Caller does not know name of gravel road. Caller states he does not have a business license.  Cherie's Notes: Name: Danny D. Reese, 113 N. 13th Street, Downing, Missouri.  Review Casenet prior to investigation.  Land Unit is aware of this concern. Maybe coordinate with them on the investigation?					
Comments								
NERO		2014-12-26	Unknown	Downing	Schuyler	Burning / Open Dumps		
Concern No.	20848	Concern Info	<a href="http://www.heartlandconnection.com/news/story.aspx?id=1140776#.VJ13CF4AAA">http://www.heartlandconnection.com/news/story.aspx?id=1140776#.VJ13CF4AAA</a>  DOWNING, MO. -- A fire in Downing, Missouri, Wednesday caused uproar in the community, even if it may not have been illegal. According to nearly a half dozen residents of the small community who contacted KTVO, two Downing residents collected a large amount of used computer equipment, then burned it on their property. One resident we spoke to told us that a law enforcement official asked the two to stop, and they complied.  There is no state or federal law governing the recycle or disposal of what is called "e-waste." All the concerned citizens who contacted KTVO, though, were unhappy with the way the computer equipment was disposed of.  It's unclear where the computer equipment was collected from. Calls from KTVO were not immediately returned by local officials.  --Click link to see photos--					
Comments								
NERO		2014-12-31	Unknown	Mokane	Callaway	Burning		
Concern No.	20861	Concern Info	The caller reports that someone is burning a large amount of trash behind a house in Mokane. The caller believes it is more than just household trash. They are concerned about the fire spreading to other properties in Mokane. The fire was seen burning last Wednesday, December 24. The caller did not know the name of the property owner or which of the three houses at the end of Collier Street the burning was taking place at.

Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
SERO	2014-12-02	2014-09-12	Pat Montgomery	Williamsville	Wayne	Burning	JD	
<b>Concern No.</b>	20071	<b>Concern Info</b>	RP is open burning demolition waste at her home.					
<b>Comments</b>	Discussed the concern with Ms. Montgomery. She said she was open burning house hold waste. I informed her of the open burning regulation and she said she would abide by the open burning regulation.							
No violation observed.								
SERO	2014-10-24	2014-10-10	Dale Sanchezgrow	Dixon	Pulaski	Burning	SBV	
<b>Concern No.</b>	20319	<b>Concern Info</b>	A blue metal building, is a welding shop on the South side of the highway, just past the Berry patch. There is a large pile of debris in a spot where some other recent burning had taken place a few weeks ago. In the pile are some concrete forms and other miscellaneous trash/scrap items to perhaps be burned. Dale Sanchezgrow is the owner.					
<b>Comments</b>	This concern was previously issued to another inspector and investigated on October 20, 2014. See Concern 2,948; ACE #20389.							
See Concern 2,948; ACE #20389.								
SERO	2014-10-21	2014-10-20	Seminole Ag Lime	Scott City	Scott	Fugitive Dust	TR	
<b>Concern No.</b>	20392	<b>Concern Info</b>	Heavy dust load from quarry wind blowing. CP talked to them and they said they were doing dust control with water. CP didn't see any. Used to crush rock now they are doing ag lime and they have a lot more dust. Air tested.					
<b>Comments</b>	I investigated this environmental concern beginning at 2:10 p.m. on October 21, 2014. The weather was sunny, the wind was from the North at 8 miles per hour, and the temperature was 70° F. The concern call was made in regards to October 17, 2014, when the wind in Scott City was reportedly from the NNW. at 15 miles per hour gusting to 22 miles per hour. Mr. Billy Harris, Superintendent, for Seminole Ag-Lime stated that the plant had begun production at 11:30 a.m. and had processed approximately 550 tons at the primary crusher and 9 loads of boulders. I reminded Mr. Billy Harris that water application is required on the equipment and haul roads at Seminole Ag-Lime and that will need to continue to keep records for review by Missouri Department of Natural Resources personnel.							
No violation was observed.								
SERO	2014-10-30	2014-10-21	Mr. Todd Moore & Glennon Moor	Perryville	Perry	Burning	TR	SER 1436525
<b>Concern No.</b>	20415	<b>Concern Info</b>	Perry County Sheriff reports he has received a complaint that Doyle C. Holmes is open burning waste of all kinds and is bringing the waste in to his property by the trailer full. The Sheriff reports Holmes may operate a tree trimming business and that he has observed open burning of vegetative debris by Holmes.					
<b>Comments</b>	At the time of my investigation, on October 30, 2014, a smoldering pile of vegetative wastes was observed. I located Mr. Doyle Holmes; but he stated that he had made the statement to the Perry County Sheriff's Office and had attempted to report the open burning of various wastes by Mr. Todd Moore, Owner of Southern Landscape Services on property belonging to his father, Mr. Glennon Moore, Jr. I took photographs of the burn site from the residential road. I was unable to locate Mr. Todd Moore at this time, but I did call his telephone and leave a message. Mr. Todd Moore returned my telephone call on October 31, 2014, and confirmed that he had been open burning vegetative wastes on his father's property. He also confirmed that he had been accumulating wastes without burning since receiving an earlier Notice of Violation (issued 2-16-2010) for the open burning of trade wastes without an open burning permit. I briefly stated the regulatory requirements and informed Mr. Moore that additional Notices of Violation would be issued.							
Notices of Violation were issued to both Mr. Todd Moore and Mr. Glennon Moore, Jr. for open burning in violation of 10 CSR 10-6.045 Open Burning Requirements.								

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### **Monthly Air Pollution Control Program Detail Report**

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
SERO	2014-12-02	2014-10-22	Greg McGrew	Cardwell	Dunklin	Burning	JD	
<i>Concern No.</i>	20416	<i>Concern Info</i>	Burning shingles and rubber siding.					
<i>Comments</i>	Did not observe open burning of Shingles. Mr. McGrew stated that he had the shingles piled waiting to haul away and "teenagers" set the pile on fire. The police was notified and a report was written supporting the information.							
	Vandalism-No violations observed.							
SERO	2014-11-04	2014-10-22	Country Mart Manager Todd Clar	Farmington	St. Francois	Air Odors	TR	
<i>Concern No.</i>	20419	<i>Concern Info</i>	Not set up for vapor recovery lines. Truck driver does not have vapor recovery line. Open tank valve. Placard is 1203 (reg. gas) Fumes making CP dizzy. Gas fumes horrible. Making CP sick.					
<i>Comments</i>	I contacted Ms. Heather Peters of the Hazardous Waste Program on October 23, 2014, to find out if the information in this concern would amount to a significant violation. The matter will be addressed during the next annual inspection. Mr. Richard Swartz of the Air Pollution Control Program was also contacted on October 24, 2014. Since the Missouri Department of Natural Resources Air Pollution Control Program has not accepted enforcement authority for the Maximum Achievable Control Technology area source rule Subpart CCCCCC this issue was also referred to Mr. Bill Peterson of US Environmental Protection Agency Region VII in case stage I vapor recovery is an applicable requirement. I was near the Country Mart gas station on October 30, 2014, for odor observations. No odors were noted; but only customer traffic and fuel purchases were taking place at the station for the time period from 10:33 a.m. to 11:34 a.m. There is a Phillips 66 station further south along Karsch Boulevard, which could have also contributed to the odor problem. There is also a carwash and the station is near the intersection of two busy streets (Washington Street and Karsch Boulevard), vehicle traffic also might contribute to fuel odors. No product spill or leak problems were apparent at the time of my investigation.							
	No air pollution violation was observed.							
SERO	2014-10-27	2014-10-22	Timber Ridge Landfill	Richwoods	Washington	Air Odors	TR	
<i>Concern No.</i>	20420	<i>Concern Info</i>	Odors are bothersome and has been since the first of the year.					
	Please call CP with observation and findings. This complaint was referred from EPA.							
<i>Comments</i>	I investigated this environmental concern beginning 11:23 a.m. on October 22, 2014, and ending at approximately 2:20 p.m. Both upwind and downwind positions were visited; but no odor plume was found. (The weather was sunny with wind from the ENE. at 8 miles per hour and temperature of 63°F). I spoke with the concerned caller, Mr. David Richard, on October 24, 2014, in regard to whether any unusual weather or other condition coincided with the odor issue. Mr. Richard stated the odor is intermittent in nature and has been worse this year than at other times with more frequent abnormally bad odors all this year. He stated that there has been no particular weather condition or weather pattern that coincides with the odors so far. I also spoke with Mr. Walter Callahan, Manager of Timber Ridge Landfill. Mr. Callahan said he had received some calls about the odor as well and had looked into them. He said that they had not been doing anything unusual on October 21, 2014, but that it had just been the usual routine. (The weather on October 21, 2014, was sunny with wind from the North at 11 miles per hour and a temperature of 70°F.) He stated that he has been in contact with his Corporate Office and will be discussing the situation with them this afternoon in order to come up with a good action plan for dealing with the odors.							
	No violation observed.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SERO	2014-11-06	2014-11-04	Geyland Lawrence Rice Mill and	New Madrid	New Madrid	Fugitive Dust	TR	
Concern No.	20529	Concern Info	The air emissions from the rice mill and the cotton gin are extreme and degrading the air quality when they are operating. Rice hulls can be found several blocks away on surfaces. The amount of dust released into the air is worse at night. It is like they wait until night to expel the worse dust.					
Comments	Is there a dust collection system not working or not installed? The town is populated with mainly elderly persons and the degraded air quality is not easy on them. I really hope you can see the operation at night at the elevators at the rice mill. It's not conducive to a healthy environment. I hope something can be done.							
I investigated Farmers Storage, Inc. and Richardson Gin, Inc., which are both located in Marston. Farmers Storage is a grain elevator that receives only rice. The rice received is sometimes dried to decrease internal moisture, is stored, and then shipped out of the facility. Farmers Storage is not required to have an air construction permit or an air operating permit. I spoke with Mr. Jeff Wright, Operations Manager for Farmers Storage. Farmers Storage was not operating because their storage bins were close to capacity. I reminded Mr. Wright that the facility needs to control emissions, so that they remain on site as much as possible. Richardson Gin is a gin operation that receives raw harvested cotton from the fields and dries, cleans, and bales both the white cotton lint and the lesser lint motes. Richardson Gin was operating at the time of my investigation; but no problems were noted. The contact person is Mr. Barry Richardson, Jr. Vice-President for Richardson Gin. Richardson Gin has an air construction permit and an air operating permit. Richardson Gin operates with cyclones and screens as control devices. The cyclones and associated fans must be in use to prevent the cotton from plugging up the gin. When cotton plugs up a gin, the gin must be shut down to avoid fire and to resume successful operations; since the gin uses air pressure to convey the cotton through the gin from one piece of equipment to another until the lint and the motes are stored or shipped of site. I reminded Mr. Barry Richardson, Jr. of the regulations and permit limits. I left the fact sheet entitled "Odor, Dust, Asbestos, Open Burning and Freon Emissions," with both facility contact persons as a reminder.								
No violations were observed.								
SERO	2014-12-02	2014-11-04	Pallet Connection and Farms-Fa	Sikeston	Scott	Burning	JD	
Concern No.	20530	Concern Info	Burning every night in barrels, burning cardboard, plastic and wood. They set them on fire and let them burn until they burn out. You can see the glow on the side of the building. Last week they brought in a large chipper and made a wind row down the middle. And CP thinks they will set it on fire.					
Comments	Observed open burning in barrels on the site. Two large "Wind Rows" have been created at the facility. Photos taken.							
On November 10, 2014, Mr. Clay Landgraf of Landgraf Excavating and Construction called to ask for a open burning permit for Pallet Connection. Mr. Landgraf stated that they had been hired by Pallet Connection and Farms to "Wind Row" the wood and burn the debris. I informed Mr. Landgraf that a open burning permit could not be issued until the facility complied with the state regulations and they were in good standing with the Department. I also informed him that we have an injunction against Pallet Connection and Farms about open burning. Mr. Landgraf then stated that he would not be participating in open burning at the facility.								
Referred the information to the Enforcement and Compliance Unit.								
SERO	2014-12-02	2014-11-04	Pallet Connection and Farms-Fa	Sikeston	Scott	Burning	JD	
Concern No.	20531	Concern Info	RP chipped up a bunch of pallets and dumped them on the farm and set them on fire. CP says the fire department was called to the scene.					
Comments	I observed evidence of open burning that had occurred at the property. I also observed large debris piles of pallets, wood pieces, spools, plastic and cardboard at the property that had not been burned.							
Referred to Compliance and Enforcement Unit.								

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SERO	2014-11-24	2014-11-07	Doniphan Ready Mix	Doniphan	Ripley	Fugitive Dust	TR	
Concern No.	20556	Concern Info	The caller reports that a ready mix cement plant releases cement dust whenever the plant receives a new truck load. Caller states that the plant receives about two loads a week and that the dust is getting on the neighbors' property. Facility has been in the early stages of moving to a new location for six or seven years according to the caller.					
Comments	This facility will be moving to a new location and new plant in February or March of 2015. New location will be 1105 County Road 142E-20 in Doniphan, Missouri. The new plant is permitted as 181-0023 and has been under construction for years under a previous air construction permit (082006-009). Money has been the cause for the delay. I discussed the concern with several personnel working at the existing facility, which is a late 1960's or early 1970's ready mix plant. The existing plant sometimes has a problem when receiving portland cement at high pressure. Facility personnel have to warn new delivery drivers that the plant needs to receive low pressure loading of portland cement. The plant also has some structural integrity problems that make low pressure important. Facility does have a fabric filter in place; but the age of the plant is causing problems. The new plant is expected to have far fewer (if any issues) and will be located in an industrial area on approximately 100 acres.							
No violation was observed.								
SERO	2014-11-12	2014-11-12	Todd Moore	Perryville	Perry	Burning	TR	
Concern No.	20592	Concern Info	The concerned party state that open burning by Mr. Todd Moore is occurring and creating a lot of smoke.					
Comments	Mr. Glennon "Glen" Moore, Jr. telephoned on November 12, 2014, to report accidental open burning on his property. He stated that he had been moving material that was in the burn pile. By the afternoon of November 12, 2014, the fire was going again and creating a lot of smoke. (This incident coincided with some recent windy days.) Mr. Moore telephoned again on November 13, 2014, to further report the incident. He stated that he had been using his tractor to move the burn pile on November 10, 2014. He stated that the fire was safe on November 13, 2014, but it was still burning. He restated that he had not started this fire on purpose.							
On November 3, 2014, Mr. Glennon Moore, Jr. was issued Notice of Violation SER 14365256 for open burning. On November 3, 2014, his son, Mr. Todd Moore received Notice of Violation 13054710 for open burning. This was a result of an investigation on October 30, 2014. Since the Notices of Violation were recently issued and Mr. Glen Moore's story is a possible explanation given the weather conditions and types of material involved, additional action is not planned at this time.								
SERO	2014-12-02	2014-11-26	Kenneth Bell (Bell Brothers)	Vanduser	Scott	Burning	JD	
Concern No.	20659	Concern Info	The old Cargill Grainery caught fire and burned about 5 weeks ago. The remaining waste is still burning. The smoke in town is like a fog.					
Comments	Grain facility is privately owned. It does not take in commercial grain. The Bell Brothers have 6 grain bins on their property. The bin #5 contents (rice) is smoldering and on fire. The adjacent bins and the homes surrounding the bin are in danger of catching fire if the bin is opened and exposed to the ambient air. Photographs taken at the site.							
No violation observed, no further action needed.								
SERO	2014-12-02	2014-12-02	Bell Brothers	Vanduser	Scott	Burning	JD	
Concern No.	20668	Concern Info	A grain bin in the middle of town has been burning for 1 to 2 months.					
Comments	Grain facility is privately owned. It does not take in commercial grain. The Bell Brothers have 6 grain bins on their property. The bin #5 contents (rice) is smoldering and on fire. The adjacent bins and the homes surrounding the bin are in danger of catching fire if the bin is opened and exposed to the ambient air. Photographs taken at the site.							
No violation observed, no further action needed.

Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2014-10-28	2014-10-07	Jo Chrismer	Washington	Franklin	Toxics	KA	
Concern No.	20624	Concern Info	Neighbor is having lead paint removed from the outside of the house. Drop cloths are being used most of the time, however a large amount of paint chips are being spilled and left on the ground around the house and on the roof. No one has lived in the home for quite some time and the property owner lives in St. Louis.					
Comments	Inspected the house and surrounding property. Met with neighbors (one being the complainant) of the house/property and discussed concern issue. The house as shown in the attached photos was being scraped by hand in preparation for painting. The possibility of the structure having been painted in the past with lead containing paint was of a concern to the neighbors. The neighbors indicated the workers had placed ground covers under the work areas to collect paint chips. However, when the covers were removed a portion of the paint chips allegedly fell onto the ground.							
The concern voiced by the neighbors was that the paint waste on the ground and possibly remaining in the roof rain gutters may pose a continuing health issue.								
As the removal of the paint was being done by hand, per the neighbors, air pollution regulations do not appear to be applicable.								
Hazardous waste considerations may still be applicable regarding paint chip disposal.								
October 29, 2014, contacted the property owner and discussed the issue. If hand scraping is continued no air pollution regulation may be applicable. Informed her that those doing the work should provide better paint chip collection, containment and provide proper disposal. An effort should be made to collect as much of the residual paint chips observed on the ground at the site and again provide appropriate disposal.								
SLRO	2014-10-21	2014-10-09	VFW Drive	Festus	Jefferson	Fugitive Dust	DB	
Concern No.	20630	Concern Info	Jason Dorlak stated that Fred Weber Quarry on VFW Drive in Festus, has had a significant increase in truck traffic in their quarry, which is resulting in quarry dust that is affecting residents in River Hills Subdivision. According to Mr. Dorlak, dust from the quarry and trucks are carrying dust out onto VFW Drive, which is getting the River Hills Subdivision residents' cars dirty when they drive past. Mr. Dorlak stated that Fred Weber was contacted yesterday about this issue. According to Mr. Dorlak, the company stated that they will look into a solution to the problem, but Mr. Dorlak wanted our department to be aware of these issues too so that we can investigate.					
Comments	The site is owned by Fred Weber Festus Stone Quarry. Mississippi Sand is mining sand from the site and crushing it onsite. Fred Weber hauls the sand to the crushing equipment for Mississippi Sand. About 3/4 of a mile from the road to the sand crushing plant is paved. There was no fugitive dust seen during the site visit and the water trucks were being operated as expected. The Quarry personnel stated that the dust that is causing problems is coming from trucks dragging mud out to the road. Fred Weber suggested that they were looking into truck washing to prevent this from happening.							
SLRO		2014-10-16	St. Louis Recharge and Fire Con	Valley Park	St. Louis	Toxics / Fugitive Dust	JM	
Concern No.	20635	Concern Info	Yellow powder released from pressurized cylinders used for fire control. The company empties content of cylinders and vent that out to the air. Not knowing what is released to the air, the caller is concerned.					
Comments	The company repairs and sells fire extinguishers and systems. Complaints is that a yellow powder is released into the air. The yellow powder is in the fire extinguisher. This powder maybe released during the repairs. To repair the extinguisher, the gas in the extinguisher is allowed to bleed off. The process to do this is to slowly open the extinguisher to allow the gas to slowly escape. While the gas is being released, the yellow powder may escape. The gas release takes place in a room which is not open to the air. There is an opening behind the release area which leads to a small hut. There is a fan which draws the powder into the hut. The hut is not open to the outside. The hut is cleaned on a monthly basis. In the area outside of the hut, the investigator did not find any evidence of leakage in the hut or yellow powder outside of the hut.							
The investigator observed two examples of the release of the gas from the extinguisher. In both cases, no release of powder was observed. The shop foreman, Mr. Dennis Bresnahan indicated that the procedure to release the gas in most cases released little if any powder.								

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2014-10-29	2014-10-21	Unknown	Normandy	St. Louis	Air Odors	KA	
Concern No.	20677	Concern Info	Bad odor that smells like natural gas detected outdoors at apartments and business in area near the intersection of Natural Bridge and Belt in St. Louis City all day today (Oct. 21) and some yesterday. Laclede Gas Co. responded today and tested the air and stated the odor was not a natural gas leak. The odor was reported to the City Citizens Bureau and they stated that they will report it to their health department but the complainant was told to call SLRO to report the odor, hence, the report was made to this office at noon today (Oct. 21).					
			A check with the NOAA NWS indicated that wind was variable and easterly at 6 mph and it was Sunny and 63 degrees F at the time this was reported.--Tom Sims					
Comments	Surveyed area indicated to be where odor had been noted by the complainant.							
	No odor noted.							
	Main possible source of malodors may be located within the Union 70 Center Business Park. No probable source can be noted within the park as potential to emit the malodor alleged is not presently known. Identifying the source could be determined through individual facility APCP source inspection but only if the odor source is located within the business park.							
SLRO	2014-10-28	2014-10-22	Steve Keterer	Eureka	Jefferson	Burning / Asbestos	KA	
Concern No.	20679	Concern Info	Caller stated that her neighbor, Steve Keterer, is dismantling a mobile home and burning it in his backyard. The mobile home that is being burned is located across the street from Mr. Keterer's residence. According to the caller, he is taking it down a little at a time and moving the debris into his yard at 7843 Jim Weber Road, Eureka.					
			I suggested that the next time that Mr. Keterer is burning debris from the trailer, she should call the fire department for an immediate response.					
Comments	Met with Mr. Keterer at his home. Dismantled mobile home site across from Mr. Keterer's residence. Mobile home was destroyed during a vehicle accident. The mobile home owner hired Mr. Keterer to demo the mobile home. Demo waste was hauled away from the site. Wood waste was moved to Mr. Keterer's residence and was/is being burned during recreational fires Mr. and Mrs. Keterer have in the evenings. Mr. Keterer indicated that no prohibited demo waste has been burned and that only untreated wood is put in the evening fires.							
	No direct evidence to show demo waste other than wood has been burned.							
SLRO	2014-10-23	2014-10-22	Unknown	St. Louis	St. Louis City	Air Odors	DK	
Concern No.	20685	Concern Info	Anonymous caller states gas like odor in neighborhood between Belt and Clara Avenue just south of Natural Bridge.					
			Caller states Laclede Gas has checked neighborhood for gas leaks and found nothing.					
			Caller believes odor may be coming from a chemical company.					
Comments	The location of the concern was visited on October 23, 2014, between 11:10 and 11:30 AM.							
	No odor was detected in the area around 5519 Palm Street.							
	Investigator did notice numerous areas where digging had taken place in preparation for apparent sidewalk replacement.							
	Investigator looked for but did not find the chemical company referenced by the concerned party.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2014-10-27	2014-10-23	Kuesel Soil Stabilization Heavy	St. Charles	St. Charles	Particulate	LZ	
Concern No.	20681	Concern Info	Mr. Kevin Vierling (636 699 0880) at 810 St. Charles Avenue in St. Charles, indicted that he has been seeing small white powder/hair like material, may be plastic in nature (does not look like ash) on his black pickup at home (driveway) for 8 weeks now. The caller said that his wives car is white colored and he could not see the powder on her car. He indicated that this material is light and may travel far from its origin. The caller does not know where it is coming from. Windy day or not does not matter he said. Not clear if the white powder comes during the night or during the day. There is new construction going on for a while at the intersection of West Clay and First Capital Drive.					
Comments	At the time of investigation, there was no dust or white powder visible in the area. Mr. Kevin Verling and residents on St Charles Road were contacted during the investigation. Most of the residents contacted indicated that the white powder may be coming from the road construction site east of West Clay and First Capital Drive intersection in the City of St. Charles.  Mr. Bryn who works for the Road Construction Company (Kuesel Soil Stabilization Company) said there may be white powder in the air if Cordel chemical is used as a stabilizing agent during filling operation. Mr. Bryan indicted they are not using the chemical currently. I contacted Mr. Steve Nonan, supervisor of the project at the City of St. Charles Public Works Department. He told me that they have not used Cordele chemical for some time now. Mr. Nonan said that he will contact the road construction company and investigate the issue. Mr. Nonan also indicated the road construction project will be completed in December 2014.							
SLRO	2014-10-28	2014-10-24	NB Asphalt	Pacific	Franklin	Air Odors	DB	
Concern No.	20682	Concern Info	Mr. Coleman stated that the NB Asphalt plant in Pacific, Missouri, had a really bad odor this morning at 6:30 AM. He wants someone to evaluate the plant. The plant, according to Mr. Coleman, produces a very bad smell that he can smell from his house, which is about a mile away.					
Comments	NB Asphalt plant was not mixing asphalt at the time of the site visit. The odors are most likely associated with the mixing process, which is generally done in the early morning hours. No odors were evident during the site visit.							
SLRO		2014-10-28	Missouri Mulch & Landscape Su	Cottleville	St. Charles	Storm Water / Fugitive Dust	RL	
Concern No.	20686	Concern Info	Landscape company borders property. All sorts of wood/vegetation waste is accepted. The material is ground and is stockpiled as mulch that is sold. Company has ground material approximately 4-5 times so far this year. The dust has been bad. Complainant and wife have never had allergies in the past, but have had numerous problems this year. The mulch pile is approximately 18 ft. high and is located less than 100 ft. from complainants property line. The property is on an incline, so the mulch pile diverts storm water flowing down the property onto the complainants property from which it eventually flows into a tributary. The site is approximately 2-3 acres in size. Complainant did not know if the facility had a storm water permit.  Complainant was also concerned about the noise from the operation and the fact that they start up around 7:00 am. I informed him that the DNR does not regulate these issues and recommended that he contact the City of Cottleville and/or St. Charles County. I also informed him that compost operations are not required to have a solid waste permit from the DNR, but that this may be required by the county or city.					
Comments	*Complainant would like to be contacted before the investigator goes to the site so he can meet and discuss the issue.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
SLRO		2014-11-05	Birkemeier Construction working	University City	St. Louis	Air Odors	SW	
<i>Concern No.</i>	20720	<i>Concern Info</i>	Mr. Lachajczyk complained that his neighbor had a new driveway installed yesterday and today the contractor applied a clear sealer that had a bad odor and was making him and his family sick. He was worried that the solvents might kill his rabbit and bird and cause cancer. I told the complainant that this was not a regulated activity but offered to contact the construction company and request a Safety Data Sheet in order to determine what odorous materials he was smelling. He said he had spoken to the St. Louis County Health Department who referred him to DNR.  I immediately followed up by telephone to the office of Birkemeier Construction and spoke to a secretary. She did not have access to the product information but said she would have the information sent to me by fax or email when the workers return from the job.					
<i>Comments</i>								
SLRO	2014-11-17	2014-11-10	Drury Inn	St. Louis	St. Louis City	Air Odors	KA	
<i>Concern No.</i>	20723	<i>Concern Info</i>	Complainant was referred from the St. Louis City Citizens Services Bureau to the SLRO for the reported excessive idling by diesel-powered passenger coach-type buses owned and operated by the Drury Inn. The complainant stated that the buses frequently continuously idle while unoccupied for over an hour at a time, while parked at the Drury Inn (near Hampton and I-44), which is about a 1000 feet from his residence. The complainant also stated that a member of his household may be experiencing respiratory distress as result of the idling. The complainant indicated knowledge of the St. Louis City and St. Louis County idling rules and stated that he has a working history in the area of environmental compliance.  10 CSR 10-5.385, "Control of Heavy Duty Diesel Vehicle Idling Emissions."					
<i>Comments</i>	Met with Mr. Roe and discussed complaint. No passenger vehicles related to the complaint were located on the property at the time of the site investigation. A copy of the applicable Chapter 5 regulation was provided for review.							
SLRO	2014-11-17	2014-11-12	The Doe Run Company		Jefferson	Fugitive Dust	DB	
<i>Concern No.</i>	20755	<i>Concern Info</i>	The concerned party stated that she could see visible white emissions crossing from Doe Run's property crossing over their property line. She was concerned about the health hazard associated with this emission.					
<i>Comments</i>	Doe Run stated that they were neutralizing a sulfuric acid tank on November 11, 2014, when the allegation occurred. Doe Run speculated that the white emissions was part of the neutralization and tank cleanout process. There was no fugitive emissions noted during the inspection. The tank that was neutralized and cleaned out could be seen from the River Road.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2014-11-17	2014-11-14	Landfill Equipment	Herculaneum	Jefferson	Industrial Site Specific	DB	
Concern No.	20771	Concern Info	Gary Bertram, US-EPA R-7, called with a brief description of a complaint he had received via the EPA web site and then forwarded the email for SLRO to handle. The complainant states: "On 11/12/2014, at approximately 0900 hours the Landfill Equipment Company was releasing extremely large amounts of gray/green smoke from a short flume on top of the business. The smoke was filling the valley including covering Interstate 55. Upon driving through the area the odor of the smoke was extremely strong. Residential subdivision and condominiums located just south of the business in the direction the smoke was blowing.					
			Specific Directions: Interstate 55 at McNutt Road, next to Sapaugh car dealership; Violation Still Occurring? Yes; State DEP/DEQ/DEM Notified? No"					
Comments	Preliminary info: According to www.landfill-equip.com the company refurbishes, rebuilds and repaints Caterpillar equipment. They were not found in MOEIS or inspection list. The facility refurbishes landfill compacters for re-sale and for customers. The facility welds, replaces engine parts, rebuilds wheel assemblies, and various maintenance activities. The shop does some touch up painting in their shop with aerosol spray paint but there is no spray booth. The smoke from the concern was coming from a wood burning furnace that was built in their shop by their employees to provide comfort heat. The furnace was a hand-fired wood burning unit that did not meet the requirements of 10 CSR 10-5.040 because it was not commercially manufactured.							
SLRO	2014-11-20	2014-11-18	Dennis Tacchi	Pevely	Jefferson	Asbestos	DB	
Concern No.	20779	Concern Info	I spoke with Mrs. Christina Cook on 11/19/2014. She indicated that she was concerned about the speed at which a building at the Vision of Peace Hermitages was demolished and she believed that some asbestos laws were overlooked. Mrs. Cook provided me contact information for the president of the board which oversees the Vision of Peace property.					
Comments	The Vision of Peace Hermitages is a Catholic ministry retreat. There are nine living units that as many as nine guests may stay at. The living units surround a central building used for conferences. The central building was demolished on 11/17/2014 by Bill Martin Construction LLC. The building was inspected for the presence of asbestos on 10/3/2014 and non-friable asbestos was removed by AG Environmental prior to the demolition. Bill Martin Construction failed to submit a demolition notification as required.							
SLRO	2014-12-02	2014-11-24	AJ Houska	Arnold	Jefferson	Burning	KA	
Concern No.	20778	Concern Info	Concerned party, Stanley Moran - 314-302-9969, stated that his neighbor is burning vegetative waste that is being hauled in from off site and burned. The concerned party stated that he has called the Rock Community Fire Protection District twice. The concerned party alleges that the fire department informed him that the burning is 'legal,' however, the concerned party said that he saw a burned couch which he knows is not legal. The concerned party wants the burning stopped.					
Comments	Open burning warning letter prepared 12-2-14. To be mailed when complete.							
SLRO		2014-12-15	Steinberg Skating Rink	St. Louis	St. Louis City	Burning / Air Odors		
Concern No.	20803	Concern Info	Complainant frequents local city ice skating rink park. Park has an ongoing recreational fire during open hours. Complainant alleged the smoke from the fire drifts across the rink creating a potential adverse health issue for the skaters. City of St. Louis Citizens' Service Bureau has been contacted, but per the complainant, little apparent concern was shown by the unnamed city representative.					
			(Complainant was informed of the DNR's recreational fire allowances in that the use of a burn pit for heat using non-treated wood is not likely a violation of any APCP regulations. Complainant was encouraged to contact the local health department and investigate whether health department regulations may be applied.)					
Comments								

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2015-01-02	2014-12-22	AJ Houska	High Ridge	Jefferson	Air Odors	DB	
Concern No.	20868	Concern Info	Auto paint and body shop emitting strong solvent odors that bothers the complainant and his customers. The complainant stated that the odor has been progressively getting worse over the past few years and he has already talked to the body shop to no avail.					
Comments	No record if New Source Review was performed or if the Paint Booth exemption under 10 CSR 10-6.061 is maintained--TWS A hazardous waste and air pollution CEI was conducted at the site in response to the concern. The facility sprays solvent based primers and water based paints in 30' x 16' spray booth. Good housekeeping practices appear to be followed as all of the paints were kept in sealed containers and there was no evidence of spills. The facility's spray booth had a 5' x 5' air intake at the top of the booth and filtered air exhaust at the bottom of the booth, which is directed to a stack located in the back of the building. During the inspection, the facility measured the distance from the stack to the nearest property line. The stack was found to be > 80' to the nearest property line.  The facility is a conditionally exempt generator of hazardous waste. The facility utilizes an exempt resource recovery unit to reclaim their solvent. The waste from the unit is managed as an F005 waste. The facility also generates used oil. The facility was not spraying paint at the time of the inspection.  There was no odors detected at the time of the inspection.							
SWRO	2014-10-17	2014-10-07	American Tripoli	Seneca	Newton	Particulate	CG	
Concern No.	20294	Concern Info	The attached email from EPA shows concern about fugitive dust from rock grinding process.					
Comments	No violations. Facility was shut down during investigation. Plant manager Bruce Anderson said that the facility blew out some bags in the bag house and as soon as they noticed it, they shut the plant down.							
SWRO	2014-10-22	2014-10-09	3G Processing	Mountain Grove	Wright	Air Odors	RB	
Concern No.	20304	Concern Info	Smell coming from 3G Processing is horrible. Has been getting worse in the last week and a half. Odor can be smelled all the way to the McDonalds.					
Comments	Minor odor downwind of the plant across the tracks on Busch Street adjacent to the golf course. Odor did not meet the 7-1 threshold.							
SWRO	2014-10-17	2014-10-15	MoArc	Neosho	Newton	Air Odors	CG	
Concern No.	20340	Concern Info	Odor in the morning of 10/15/14.					
Comments	No violations found. There was strong odor along D Highway running through the property, but an odor reading cannot be taken there. There was not a strong enough odor for a detection beyond the property line east or west of the facility.							
SWRO	2014-10-21	2014-10-20	Unknown	Springfield	Greene	Burning	RB	
Concern No.	20408	Concern Info	Caller said neighbors are burning on a regular basis, causing a nuisance as it is in residential neighborhood, last time they were burning a mattress, but also trash on a regular basis. Caller contacted the county and they referred her to DNR. Unknown name of responsible party, they are renters.					
Comments	Burning in a recreational fire pit. A small amount of trash was seen in the pit. I spoke to the resident (Shaquille Makatchie) and explained the open burning regulations. They are planning to move out of state. Copies of the regulations were not necessary.							

*Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.*

### Monthly Air Pollution Control Program Detail Report

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Concern</i>	<i>INSP Initials</i>	<i>NOV</i>
SWRO	2014-10-29	2014-10-21	unknown tenant	Airport Drive	Jasper	Open Dumps / Burning / Asbestos	MK	
<i>Concern No.</i>	20409	<i>Concern Info</i>	Complainant called to say he is a neighbor of a landowner who has/had a tenant living on his property. This tenant ran a trash collecting business for which he received a fee from customers. The collector/tenant brought the trash to the subject property and disposed of it in an old barn. The tenant has now disappeared and the landowner has discovered the little present left in the barn. The complainant believes that the landowner intends to push the barn down around the trash pile and burn the whole thing. Complainant believes there is an old farmhouse nearby on the same property, which the landowner also intends to burn. The farmhouse has shingles. Question? Could the shingles be made from asbestos?					
<i>Comments</i>	I attempted to make contact with the Braker's but found no one home at the time of the visit, so I left a business card at the front door of the house and on the side door of a John Deere tractor parked next to the driveway. I was able to see the cause of concern while walking to the front door.							
	A letter will be issued along with brochures for educational purposes. A follow up visit will be conducted around December 12, 2014, to determine compliance. A concern will be wrote up for the Air Pollution Program to review and manage.

<i>Concern No.</i>	20503	<i>Concern Info</i>	Caller states source is conducting salvage burning of wire and similar. They contacted the fire department who stated it was non-emergency and would not investigate; but the fire department did try to provide a 911 address.					
<i>Comments</i>	Mr. Casey operates a metal salvage business at the property. He also burned household trash at the location until his home burned down 11-3-14. No evidence of burning wire to recover metals. All metal salvage goes to McCoy's in Springfield, including intact wire. Other solid waste goes to the landfill or transfer station. No further action at this time.

SWRO	2014-12-09	2014-12-05	Bass Pro	Springfield	Greene	Asbestos	RB	
<i>Concern No.</i>	20710		<i>Concern Info</i>	A current employee that wishes to remain anonymous called with an asbestos concern. Apparently, early this week the manager of the boat department decided to remodel the floor of the boat rigging area, which is located in the old Kmart building to the west of the Bass Pro store at 1935 S. Campbell Boulevard in Springfield, Missouri. The manager had several workers remove old tile. The workers were regular employees and did not use safety equipment. When the facility maintenance department learned that the other employees were removing floor tile they stopped the work and told everyone to keep their mouth shut. The employee did not know where the flooring waste was and was unsure of the amount of tile removed but the job was not completed. They parked a forklift in front of the building to limit access. The area is still used by Bass Pro associates and the caller was concerned about continued exposure and exposure to the workers who removed the tile. He said the maintenance group believed the tile to be asbestos but he was unsure if they used testing or assumed. I provided the caller my contact information and advised him to call me back if he wanted to add any information or wanted to follow up.				
<i>Comments</i>	Spoke with Pete Duchrow, Operations Manager, and we inspected the remodel site. Approximately 3,200 square feet of 12"x12" floor tile had been removed from the boat rigging area. I then contacted Dan Hoy, Facility Director, and he confirmed that a 20'x15' section of floor tile had been removed before supervision was notified. At that time, December 4, 2014, asbestos content was questioned and work was stopped, the building was evacuated, and the HVAC system was shut down. Bass Pro's environmental consultant Environmental Works was called and they subcontracted the response to Archway Inspections. Air sampling was done and the tile/mastic was sampled by Archway Inspections. Workers were not allowed to return until a verbal report was received. On December 5, 2014, the area was cleared. Archway Inspections then completed removal of the remaining floor tile in that bay. Mr. Hoy said asbestos awareness would be added to employee training to prevent future issues. No other renovation is planned for the building.							
SWRO		2014-12-09	Marti Racing	Jasper	Jasper	Air Odors / Fugitive Dust		
<i>Concern No.</i>	20711		<i>Concern Info</i>	Gary Bertram from EPA Region 7 called with a concern that was anonymously e-mailed to him. The complainant says that Marti Racing is spray painting cars outside their shop (not in booth) and that the paint spray is free to travel in the air to whatever receiver is there to breathe it in. This is some kind of auto body collision and repair facility which doubles as a racing shop.				
Call Mr. Bertram at (913) 551 7533 to report or ask for copy of e-mail sent to him if you need to.

<i>Concern No.</i>	20859	<i>Concern Info</i>	Southern Stone County Fire District has responded several times to the Indian Ridge Subdivision for illegal burning. They have provided the foreman, Mr. Richard Cols, with burn permit applications and burning regulations. They have observed the company burning treated lumber as they are demolishing the buildings at the site. The fire district feels that they are not getting anywhere with the company as they continue to burn treated lumber. This site has a history with water pollution issues and is currently under new ownership.
